

REVIEW FORM

Each article undergoes a "double-blind" review process, in which identities of author(s) and reviewer(s) are not disclosed. Reviewers should decline a review request if they lack sufficient expertise. Reviewers must inform the Editor of any possible conflict of interest or irregularities connected to the paper under review. Any paper received for review must be treated as a confidential document.

TITLE OF THE ARTICLE: _____

Please fill in the Form on the suitability of the article for publication in the *Collected Papers of Šibenik College*.

CONTENT RATING (by circling or bolding one of the offered options, rate each of the mentioned aspects of the article):

1	The title of the article reflects the content and purpose of the article.	Yes	No
2	The summary is relevant and concise (up to 250 words).		
3	Keywords reflect the essence of the article (up to 5 keywords).		
4	With a brief overview of general research, the author introduces the issues he/she investigates in the article.		
5	The methodology is clearly defined.		
6	The article represents the original contribution of the author.		
7	The presentation of the research results supports the applied methodology, conclusions and recommendations.		
8	The conclusion contains clearly stated scientific claims, open questions and recommendations for further research.		
9	The article is readable, written in standard language without spelling and grammatical errors, relevant and interesting to the readership.		
10	The scope of the article is appropriate (up to 20 pages of A4 format).		
11	References and bibliography reflect the topicality of the article.		

The reviewer's final recommendation (check one of the options provided) for the suitability of the article for publication:

- Accepted
- Conditionally accepted with the comments of the reviewer
- Not accepted

If your evaluation of the article is positive, please classify the article according to the offered categories:

1. Original scientific article - a work characterized by originality of conclusions, or it presents previously unpublished original results of scientifically conceived and conducted research;

2. Preliminary announcement - a work containing the first results of research in progress, which due to current events require quick publication, but without the level of comprehensiveness and foundation required for scientific work;

3. Review paper - a work that contains a thorough and comprehensive critical review of a certain issue, but without significant originality of the results;

4. Professional paper - work that contains knowledge and experience relevant to a certain profession, but does not have scientific features. Ukoliko je vaša procjena članka pozitivna, molimo Vas da članak klasificirate prema ponuđenim kategorijama:
